ROHITH

FULL STACK WEB DEVELOPMENT

PROFILE

A passionate and motivated Full Stack Web Development with knowledge in both front-end and back-end technologies. Recently completed full stack web development course with hands-on experience in creating static and dynamic, responsive, and user-friendly web applications. Proficient in core web development technologies such as HTML, CSS, JavaScript, and familiar with front-end frameworks like React and back-end technologies like Node.JS, Express-JS and database MySQL. I am eager to contribute to innovative projects and grow as a Full Stack Web Developer in a dynamic development team.

PROJECTS

PORTFOLIO

https://rohith198-cmd.github.io/Personal-Portfolio/

 Developed a fully responsive and interactive personal portfolio website to showcase skills, projects, and experience. The portfolio includes sections for an about me, contact information, and various projects with interactive elements. It demonstrates proficiency in front-end web development, including layout design, animations, and dynamic content manipulation using JavaScript.

INVENTORY MANAGEMENT SYSTEM

Developed an Inventory Management System using React.js for frontend and Node.js/Express for the backend, integrating seamless CRUD operations for managing inventory data. The application utilizes Axios for making API calls to the backend, allowing for real-time data interaction. Implemented React Router for smooth client-side navigation between different views, and employed React Context API for global state management, ensuring consistent data flow throughout the application.

On the backend, designed and implemented a RESTful API to handle inventory-related requests, including adding, updating, and deleting items. The system is connected to a database MYSQL to store and manage inventory data persistently. This project showcases my ability to build a full-stack application, handling both frontend and backend development, and providing a robust, efficient solution for inventory tracking and management.

Technologies Used: React, Express.js, MySQL, Node.js, Bootstrap
